## ABOUT ME

I'm Molly, a designer that dabbles in a bit of everything from web/mobile responsive design, banner ads, motion graphics, and a basic knowledge of front end HTML/CSS. If you have a project, I'm here to help as I'm ready to tackle anything sent my way.

## Experience

### CMP Tech // Designer

2015 - 2019 // Full Time

I was the lead designer in our Rochester office for the past year or so. Together with our marketing team and developers, I worked on design projects ranging from making responsive websites, banner ads, print and exhibit displays, social media ads, and more for our products.

### Rochester 100 Inc. - Nicky's Folders // Graphic Designer

2011 - 2013 // Part Time

Create sample layout designs for customers ordering custom stamping for folders/insurance holders/mini wallets. I spoke and worked with clients on a daily basis to make sure I fulfilled their requirements and got their orders finished in a timely manor.

## Education

### Rochester Institute of Technology

Bachelors Degree in New Media and Design - Class of 2015
